

TOYOTA**MOTOR MANUFACTURING CZECH**

REFRIGERANT REUSE CONFIRMATION

SUPPORTING THE CIRCULAR ECONOMY

Toyota Motor Manufacturing Czech Republic handed over refrigerant from 2 old chiller systems to Daikin, thus avoiding the production of new refrigerant and consumption of natural resources.

Daikin Europe N.V. confirms that 295,2 kg of R-407C refrigerant were recovered from old HVAC equipment and will be reclaimed and reused for the production of new HVAC systems.

Thereby Toyota Motor Manufacturing Czech Republic, s.r.o. supports the circular economy of refrigerants, further reducing its environmental impact.
