

FXTQ80-100A

| Field piping |                       |               |
|--------------|-----------------------|---------------|
| Indoor unit  | Gas side Ø            | Liquid side Ø |
| FXTQ80A7VEB  | Ø19. 1 Accessory pipe | Ø9. 5         |
| FXTQ100A7VEB | Ø22. 2 Accessory pipe | Ø9. 5         |

|   | Name                           | Description                                                                          |
|---|--------------------------------|--------------------------------------------------------------------------------------|
| ① | Liquid pipe connection port    | Flare connection                                                                     |
| ② | Gas pipe connection port       | Brazed connection                                                                    |
| ③ | Grounding terminal             | Inside of the switch box (M5)                                                        |
| ④ | Control box                    |                                                                                      |
| ⑤ | Power supply connection        |                                                                                      |
| ⑥ | Transmission wiring connection |                                                                                      |
| ⑦ | Hook                           | M10                                                                                  |
| ⑧ | Air discharge side             |                                                                                      |
| ⑨ | Air suction side               |                                                                                      |
| ⑩ | Accessory pipe                 | Brazed connection                                                                    |
| ⑪ | Nameplate                      |                                                                                      |
| ⑫ | Drain pipe connection          | Internal pipe thread PS1B<br>Largest diameter Ø33, 349<br>Smallest diameter Ø30, 391 |
| ⑬ | Water inlet                    |                                                                                      |
